WORK EXPERIENCE

Front-End Developer

Anees Software House

08-2022 to 06-2023

- As a Front-End Web Developer, I specialize in creating user-centric, responsive, and high-performance web interfaces using HTML, CSS, JavaScript, and React.js. My focus is on delivering intuitive and seamless web experiences that work flawlessly across various devices and browsers.
- I am proficient in HTML, CSS, JavaScript, and React.js, with a strong foundation in front-end development principles. I have a deep understanding of essential web technologies and best practices, which I apply to build visually appealing, efficient, and accessible interfaces.
- My expertise includes optimizing web assets and code for speed and scalability through techniques such as minification, compression, and caching.

Back-End Developer

Self Learner

Present from 2024

- I work closely with designers to translate UI/UX designs into functional, interactive interfaces. I also collaborate with back-end developers to ensure seamless integration of front-end and back-end components, delivering cohesive and functional web applications.
- As a front-end developer, I specialize in creating user-friendly and responsive web pages using HTML, CSS, and JavaScript. I focus on delivering intuitive and seamless web experiences that work flawlessly across all devices.
- As a back-end developer, I work with Node.js, Express, and MongoDB to build server-side logic and database interactions for dynamic web applications.
